Dear Bill, 6/7/97

This has kept me busy and tired me more.

Reur 6/3, so glad your dad is doing better! If I live long enough I'll face having the TURP replaced or redone. Think they'd now more likely use microwave.

Thanks much on Dal. Thought he had disk of Waketh but guess not. He is a fine person.

The epilogue is being retyped. The student who is doing it stopped and read the first chapter after typing it, she found it that interesting.

Jerry is retyping Bohus Revelation. He offered to and yesterday had done the preface. Says what is I'm sure true, needs some editing, cutting.

Best,
